

I am writing concerning the LPFM stations vs FM translators. I am not sure just what the difference is exactly, but I do know that my favorite station, KLOVE will be affected. KLOVE is a very important part of the lives of our family and friends. It provides music and inspirational stories/programming that has a positive influence on lives. It not only touches us locally but also allows us to hear about things on a national level. KLOVE which is 90.7 in our area provides a link to the world around us while still providing us with local information, like upcoming events and weather. I believe if KLOVE was no longer able to broadcast in this area, that many people would be disappointed. There is a strong sponsorship in this area. KLOVE provides an avenue for people from all over to reach out to others all over the world as well as an avenue to reach the needs of people here in our local area. KLOVE has become a very important part of peoples' lives locally. I have listened to the music and had people ask me about the nice music I was listening to at the time. Several people around me have started listening to KLOVE on a regular basis in the last year or so. I believe that something that is able to bless people and provide a positive outlook is something worth keeping. Please don't allow legislation to take away something that is very important to many of us. Thank you for your time and attention to this matter.
